EXPLANATORY NOTE

We are filing this report on Form 20-F as a special report pursuant to Rule 15d-2 under the Securities Exchange Act of 1934. Rule 15d-2 under the Securities and Exchange Act of 1934 provides generally that if a foreign private issuer files a registration statement under the Securities Act of 1933, which does not contain certified financial statements for the company's last full fiscal year, then the company must, within the later of 90 days after the effective date of the registration statement or six months following the end of the company's latest full fiscal year, file a special financial report furnishing certified financial statements for the last full fiscal year.

Our registration statement on Form F-4 (Registration No. 333-203685), declared effective by the Securities and Exchange Commission on May 1, 2015, did not contain certified financial statements for the fiscal year ended March 31, 2015. In accordance with Rule 15d-2, this special report is filed under cover of Form 20-F and contains only financial statements for the fiscal year ended March 31, 2015.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Stockholders
Panasonic Corporation:

We have audited the accompanying consolidated balance sheets of Panasonic Corporation and subsidiaries (the “Company”) as of March 31, 2015 and 2014, and the related consolidated statements of operations, comprehensive income (loss), equity, and cash flows for each of the years in the three-year period ended March 31, 2015. In connection with our audits of the consolidated financial statements, we also have audited financial statement schedule as listed in the accompanying index. These consolidated financial statements and financial statement schedule are the responsibility of the Company’s management. Our responsibility is to express an opinion on these consolidated financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Panasonic Corporation and subsidiaries as of March 31, 2015 and 2014, and the results of their operations and their cash flows for each of the years in the three-year period ended March 31, 2015, in conformity with U.S. generally accepted accounting principles. Also in our opinion, the related financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, present fairly, in all material respects, the information set forth therein.

The Company currently offers a comprehensive range of products, systems and components for consumer, business and industrial use based on sophisticated electronics and precision technology, expanding to building materials and equipment, and housing business.

Sales by segment for the year ended March 31, 2015 were as follows: Appliances—22%, Eco Solutions—21%, AVC Networks—14%, Automotive & Industrial Systems—34%, and Other—9%. A sales breakdown for the year ended March 31, 2015 by geographical market was as follows: Japan—48%, North and South America—16%, Europe—9%, and Asia and Others—27%.

The Company is not dependent on a single supplier, and has no significant difficulty in obtaining raw materials from suppliers.

(b) **Basis of Presentation of Consolidated Financial Statements**

The Company and its domestic subsidiaries maintain their books of account in conformity with financial accounting standards of Japan, and its foreign subsidiaries in conformity with those of the countries of their domicile.

The consolidated financial statements presented herein have been prepared in a manner that reflects adjustments which are necessary to conform with U.S. generally accepted accounting principles (U.S. GAAP).

(c) **Principles of Consolidation**

The consolidated financial statements include the accounts of the Company and its majority-owned, controlled subsidiaries. The Company also consolidates entities in which controlling interest exists through variable interests in accordance with the provisions of Financial Accounting Standards Board (FASB) Accounting Standards Codification (ASC) 810, “Consolidation.” All significant intercompany balances and transactions have been eliminated in consolidation. Investments in companies and joint ventures over which the Company has the ability to exercise significant influence (generally through a 20% to 50% voting interest) are included in “Investments and advances— Associated companies” in the consolidated balance sheets.

(d) Revenue Recognition

The Company generates revenue principally through the sale of consumer and industrial products, equipment, and supplies. The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, and title and risk of loss have been transferred to the customer or services have been rendered, the sales price is fixed or determinable, and collectibility is reasonably assured.

Revenue from sales of products is generally recognized when the products are received by customers. Revenue from sales of certain products with customer acceptance provisions related to their functionality is recognized when the product is received by the customer and the specific criteria of the product functionality are successfully tested and demonstrated.

The Company enters into arrangements with multiple elements, which may include any combination of products or equipment, installation and maintenance. The Company allocates revenue to each element based on its relative selling price if such element meets the criteria for treatment as a separate unit of accounting as prescribed in the provisions of ASC 605, "Revenue Recognition." Revenue from sales of products or equipment is generally recognized upon completion of installation or upon acceptance by customers if installation is not required. Maintenance revenue is recognized on a straight-line basis over the term of the maintenance agreement.

The Company's policy is to accept product returns only in the case that the products are defective. The Company issues contractual product warranties under which it guarantees the performance of products delivered and services rendered for a certain period of time. A liability for the estimated product warranty related cost is established at the time revenue is recognized, and is included in "Other accrued expenses." Estimates for accrued warranty cost are primarily based on historical experience and current information on repair cost.

Historically, the Company has made certain allowances related to sales to its consumer business distributors. Such allowances are generally provided to compensate the distributors for price adjustments due to a decline in the product's value, and are classified as a reduction of revenue on the consolidated statements of operations. Estimated price adjustments are accrued when the related sales are recognized. The estimate is made based primarily on the historical experience and specific arrangements made with the distributors.

The Company also occasionally offers incentive programs to its distributors in the form of rebates. These rebates are accrued at the latter of the date at which the related revenue is recognized or the date at which the incentive is offered, and are recorded as reductions of sales in accordance with the provisions of ASC 605.

Taxes collected from customers and remitted to governmental authorities are accounted for on a net basis and therefore are excluded from revenues in the consolidated statements of operations.

(e) Leases (See Note 5)

The Company accounts for leases in accordance with the provisions of ASC 840, "Leases." Leases of assets under certain conditions are recorded as capital leases in property, plant and equipment in the consolidated balance sheets.

(f) Inventories (See Note 2)

Finished goods and work in process are stated at the lower of cost (average) or market. Raw materials are stated at cost, principally on a first-in, first-out basis or average basis, not in excess of current replacement cost.

(g) Foreign Currency Translation (See Note 14)

Foreign currency financial statements are translated in accordance with the provisions of ASC 830, "Foreign Currency Matters," under which all assets and liabilities are translated into yen at year-end rates and income and expense accounts are translated at weighted-average rates. Adjustments resulting from the translation of financial statements are reflected under the caption, "Accumulated other comprehensive income (loss)," a separate component of equity.

(h) Property, Plant and Equipment

Property, plant and equipment are stated at cost, less accumulated depreciation and accumulated impairment. Depreciation is computed primarily using the straight-line method based on the following estimated useful lives:

Buildings	5 to 50 years
Machinery and equipment	2 to 10 years

(i) Goodwill and Other Intangible Assets (See Notes 6 and 7)

Goodwill represents the excess of costs over the fair value of net assets of businesses acquired. The Company applies the provisions of ASC 350, "Intangibles—Goodwill and Other." Goodwill and intangible assets determined to have an indefinite useful life are not amortized, and are instead reviewed for impairment at least annually based on an assessment of current estimated fair value. The goodwill impairment test is a two-step test. Under the first step, the fair value of the reporting unit is compared with its carrying value (including goodwill). If the fair value of the reporting unit is less than its carrying value, an indication of goodwill impairment exists for the reporting unit and the enterprise must perform the second step of the impairment test (measurement). If the fair value of the reporting unit exceeds its carrying amount, the second step does not need to be performed. Under the second step, an impairment loss is recognized for any excess of the carrying amount of the reporting unit's goodwill over the implied fair value of that goodwill. The implied fair value of goodwill is determined by allocating the fair value of the reporting unit in a manner similar to a purchase price allocation in business combinations. The residual fair value after this allocation is the implied fair value of the reporting unit goodwill. Fair value of the reporting unit is determined using the guideline merged and acquired company method, guideline public company method, and a discounted cash flow analysis. The provisions of ASC 350 also requires that intangible assets with estimable useful lives be amortized over their respective estimated useful lives to their estimated residual values, and reviewed for impairment based on an assessment of the undiscounted cash flows expected to be generated by the asset, whenever impairment indications are presented. An impairment charge is recognized for the amount by which the carrying amount of the asset exceeds the fair value of the asset.

(j) Investments and Advances (See Notes 3, 4 and 14)

Investments and advances primarily consist of investments in and advances to associated companies, cost method investments, available-for-sale securities, and long-term deposits. Cost method investments and long-term deposits are recorded at historical cost.

The equity method is used to account for investments in associated companies in which the Company exerts significant influence over operating and financial policies, generally having a 20% to 50% voting interest, and corporate joint ventures. The Company also uses the equity method for certain investees if the minority shareholders have substantive participating rights. Under the equity method of accounting, investments are stated at their underlying net equity value after elimination of intercompany profits. The cost method is used when the Company does not have significant influence.

The excess of cost of the stock of the associated companies over the Company's share of their net assets at the acquisition date, included in the equity investment balance, is recognized as equity method goodwill. Such equity method goodwill is not amortized and is instead tested for impairment as part of the equity method investment.

The Company accounts for debt and marketable equity securities in accordance with the provisions of ASC 320, "Investments—Debt and Equity Securities."

The provisions of ASC 320 require that certain investments in debt and marketable equity securities be classified as held-to-maturity, trading, or available-for-sale securities. The Company classifies its existing marketable equity securities other than investments in associated companies and all debt securities as available-for-sale. Available-for-sale securities are carried at fair value with unrealized holding gains or losses included as a component of accumulated other comprehensive income (loss), net of applicable taxes.

Realized gains and losses are determined on the average cost method and reflected in earnings.

On a continuous basis, but no less frequently than at the end of each quarter, the Company evaluates the carrying amount of each of the investments in associated companies, cost method investments and available-for-sale securities for possible other-than-temporary impairment. Factors considered in assessing whether an indication of other-than-temporary impairment exists include the period of time the fair value has been below the carrying amount or cost basis of investment, financial condition and prospects of each investee, and other relevant factors.

Investments in associated companies, cost method investments and available-for-sale securities are reduced to fair value by a charge to earnings when impairment is considered to be other than temporary. Impairment is measured based on the amount by which the carrying amount or cost basis of the investment exceeds its fair value. Fair value is determined based on quoted market prices, discounted cash flows or other valuation techniques as appropriate.

(k) Allowance for Doubtful Receivables

An allowance for doubtful trade receivables and advances is provided at an amount calculated based on historical experience, while specific allowances for doubtful trade receivables and advances are provided for the estimated amounts considered to be uncollectible after reviewing individual collectibility.

(l) Income Taxes (See Note 10)

Income taxes are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and operating loss and tax credit carryforwards.

Deferred tax assets and liabilities are measured using enacted tax rates expected to be applied to taxable income in the years in which those temporary differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that the change in tax rate is enacted.

The Company accounts for uncertainty in tax positions in accordance with the provisions of ASC 740, "Income Taxes." The Company recognizes the effect of income tax positions only if those positions are more likely than not of being sustained. Recognized income tax positions are measured at the largest amount that is greater than 50% likely of being realized. Changes in recognition or measurement are reflected in the period in which the change in judgment occurs. The Company records interest and penalties related to unrecognized tax benefits in "Provision for income taxes—Current" in the consolidated statements of operations.

(m) Advertising (See Note 16)

Advertising costs are expensed as incurred.

(n) Net Income (Loss) per Share (See Note 11)

The Company accounts for net income (loss) per share in accordance with the provisions of ASC 260, "Earnings Per Share." This Codification Section establishes standards for computing net income (loss) per share and requires dual presentation of basic and diluted net income (loss) per share on the face of the statements of operations for all entities with complex capital structures.

Under the provisions of ASC 260, basic net income (loss) per share is computed based on the weighted-average number of common shares outstanding during each period, and diluted net income (loss) per share assumes the dilution that could occur if securities or other contracts to issue common stock were exercised or converted into common stock or resulted in the issuance of common stock.

(o) Cash Equivalents

Cash equivalents include all highly liquid debt instruments purchased with a maturity of three months or less.

(p) Derivative Financial Instruments (See Notes 14 and 17)

Derivative financial instruments utilized by the Company are comprised principally of foreign exchange contracts, cross currency swaps and commodity futures used to hedge currency risk and commodity price risk.

The Company accounts for derivative instruments in accordance with the provisions of ASC 815, "Derivatives and Hedging." On the date the derivative contract is entered into, the Company ordinarily designates the derivative as either a hedge of the fair value of a recognized asset or liability or of an unrecognized firm commitment ("fair-value" hedge), a hedge of a forecasted transaction or of the variability of cash flows to be received or paid related to a recognized asset or liability ("cash-flow" hedge), or a foreign-currency fair-value or cash-flow hedge ("foreign-currency" hedge). The Company formally documents all relationships between hedging instruments and hedged items, as well as its risk management objective and strategy for undertaking various hedge transactions. The Company also formally assesses, both at the hedge's inception and on a quarterly basis, whether the derivatives that are used in hedging transactions are highly effective in offsetting changes in fair values or cash flows of hedged items.

Changes in the fair value of a derivative that is highly effective and that is designated and qualifies as a fair-value hedge, along with the loss or gain on the hedged asset or liability or unrecognized firm commitment of the hedged item that is attributable to the hedged risk, are recorded in earnings. Changes in the fair value of a derivative that is highly effective and that is designated and qualifies as a cash-flow hedge are recorded in other comprehensive income (loss), until earnings are affected by the variability in cash flows of the designated hedged item. Changes in the fair value of derivatives that are highly effective as hedges and that are designated and qualify as foreign-currency hedges are recorded in either earnings or other comprehensive income (loss), depending on whether the hedge transaction is a fair-value hedge or a cash-flow hedge. The ineffective portion of the change in fair value of a derivative instrument that qualifies as a cash-flow hedge is reported in earnings.

(q) Impairment of Long-Lived Assets (See Note 6)

The Company accounts for impairment or disposition of long-lived assets in accordance with the provisions of ASC 360, "Property, Plant, and Equipment." In accordance with the provisions of ASC 360, long-lived assets, such as property, plant and equipment, and purchased intangibles subject to amortization, are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset or asset group may not be recoverable. Recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to the estimated undiscounted future cash flows expected to be generated by the asset. If the carrying amount of an asset exceeds its estimated future cash flows, an impairment charge is recognized for the amount by which the carrying amount of the asset or asset group exceeds its fair value.

(r) Restructuring Charges (See Note 15)

The Company accounts for costs associated with exit or disposal activities in accordance with the provisions of ASC 420, "Exit or Disposal Cost Obligations." Pursuant to the provisions of ASC 420, liabilities for restructuring costs are recognized when the liability is incurred, which may be subsequent to the date when the Company has committed to a restructuring plan.

(s) Segment Information (See Note 20)

The Company accounts for segment information in accordance with the provisions of ASC 280, "Segment Reporting." Pursuant to the provisions of ASC 280, the segments are the components of the Company for which separate financial information is available that is evaluated regularly by the chief operating decision maker of the Company in deciding how to allocate resources and in assessing performance.

(t) Fair Value Measurements (See Note 18)

The provisions of ASC 820, “Fair Value Measurements and Disclosures,” define fair value and establish a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are as follows:

- Level 1 — Quoted prices (unadjusted) in active markets for identical assets.
- Level 2 — Quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 — Unobservable inputs for the asset or liability.

The Company utilizes valuation techniques that maximize the use of observable inputs and minimize the use of unobservable inputs to the extent possible.

The Company maintains policies and procedures to value assets and liabilities using the best and most relevant data available. With regards to Level 3 valuations, the Company performs a variety of procedures to assess the reasonableness of the valuations quarterly or annually. These reviews are performed by the accounting section and approved by the President and the Chief Financial Officer of the Company. This detailed review may include the use of a third-party valuation firm.

(u) Retirement and Severance Benefits (See Note 9)

The Company accounts for the defined benefit pension plans and the lump-sum payment plans in accordance with the provisions of ASC 715, “Compensation-Retirement Benefits.” In accordance with the provisions, funded status of defined benefit pension plans (that is the balance of plan assets less benefit obligations) is recognized on the consolidated balance sheets and pension liability adjustments, net of tax, are recorded in the “Accumulated other comprehensive income (loss).”

Actuarial net gains and losses in excess of the corridor (10% of benefit obligations or fair value of plan assets, whichever is greater) are amortized over the average remaining service period of employees, except for the plan described as follows.

The Company and certain domestic subsidiaries made a transition from the defined benefit pension plan to a defined contribution pension plan, effective after the date of transition with respect to employees’ future service. Actuarial net gains and losses related to the defined benefit pension plan that are maintained for employees’ past service in excess of the corridor are amortized over the average remaining life expectancy of plan participants.

(v) Stock-Based Compensation (See Note 22)

The Company accounts for stock-based compensation in accordance with the provisions of ASC 718, “Compensation—Stock Compensation.” The provisions of ASC 718, address accounting and disclosure requirements with measurement of the cost of employee service using a fair-value-based method of accounting for stock-based employee compensation plans.

(w) Use of Estimates

The preparation of consolidated financial statements requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the consolidated financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates. Significant estimates and assumptions are used in the valuation and disclosure of revenue recognition, allowance for doubtful receivables, valuation of inventories, impairment of long-lived assets, impairment of goodwill, environmental liabilities, valuation of deferred tax assets, uncertain tax positions, employee retirement and severance benefit plans and assets acquired and liabilities assumed in business combinations.

(x) Subsequent Events

Management evaluated the subsequent events through June 26, 2015, the issuance date of the Company's consolidated financial statements.

(y) Adoption of New Accounting Standards

On April 1, 2014, the Company adopted Accounting Standards Update (ASU) 2013-05, "Parent's Accounting for the Cumulative Translation Adjustment upon Derecognition of Certain Subsidiaries or Groups of Assets within a Foreign Entity or of an Investment in a Foreign Entity." ASU 2013-05, which amends ASC 830, "Foreign Currency Matters," requires a cumulative translation adjustment, to be released into net income when an entity ceases to have a controlling financial interest in a subsidiary or group of assets within a consolidated foreign entity and the sale or transfer results in the complete or substantially complete liquidation of the foreign entity. The adoption of ASU 2013-05 did not have a material effect on the Company's consolidated financial statements.

On April 1, 2014, the Company adopted ASU 2013-11, "Presentation of an Unrecognized Tax Benefit When a Net Operating Loss Carryforward, a Similar Tax Loss, or a Tax Credit Carryforward Exists." ASU 2013-11 requires an unrecognized tax benefit, to be presented in the financial statements as a reduction to a deferred tax asset for a net operating loss carryforward for tax purposes, a similar tax loss, or a tax credit carryforward. The adoption of ASU 2013-11 did not have a material effect on the Company's consolidated financial statements.

(2) Inventories

Inventories as of March 31, 2015 and 2014 are summarized as follows:

	Yen (millions)	
	March 31,	
	2015	2014
Finished goods	473,640	449,820
Work in process	121,183	128,323

(3) Investments in and Advances to, and Transactions with Associated Companies

The most significant associated companies among Panasonic Group are Sumitomo Mitsui Trust Panasonic Finance Co., Ltd. (SMTPFC), Panasonic Healthcare Holdings Co., Ltd. (PHCHD) and Socionext Inc. As of March 31, 2015, the Company has 15.1% of the voting rights in SMTPFC, 20.0% of the voting rights in PHCHD and 20.0% of the voting rights in Socionext Inc. The Company applies the equity method to account for its investments in SMTPFC as the Company holds significant influence over operating and financial policies of SMTPFC.

On March 31, 2014, Panasonic acquired 20.0% of the voting rights in PHCHD, a company affiliated with investment funds managed by Kohlberg Kravis Roberts & Co. L.P., making PHCHD an associated company accounted for under the equity method. In addition, on the same date, Panasonic sold all of the shares of Panasonic Healthcare Co., Ltd. (PHC), a consolidated subsidiary of Panasonic which manufactures and sells healthcare devices, to PHCHD, which resulted in a gain of 78,699 million yen in other income for the year ended March 31, 2014. By owning 20.0% of the voting rights in PHCHD, Panasonic will fulfill its responsibilities to its customers to a certain extent in respect of a business which is conducted under the brand name of Panasonic.

Certain financial information in respect of associated companies in aggregate as of March 31, 2015 and 2014, and for the years ended March 31, 2015, 2014 and 2013 is as follows:

	Yen (millions)

Purchases	202,318	124,581	105,923
Dividends received	3,136	3,229	3,418

Retained earnings include undistributed earnings of associated companies in the amount of 53,100 million yen and 49,166 million yen as of March 31, 2015 and 2014, respectively.

Investments in associated companies include marketable equity securities which have quoted market values as of March 31, 2015 and 2014 and its comparison with the related carrying amounts is as follows:

	Yen (millions)	
	2015	2014
Carrying amount	3,635	24,293
Market value	5,604	37,992

(4) Investments in Securities

The Company classifies its existing marketable equity securities, other than investments in associated companies, and all debt securities as available-for-sale.

The cost, fair value, gross unrealized holding gains and gross unrealized holding losses of available-for-sale securities included in other investments and advances as of March 31, 2015 and 2014 are as follows:

	Yen (millions)			
	2015			
	Cost	Fair value	Gross unrealized holding gains	Gross unrealized holding losses

Other debt securities	16	16	—	—
	<u>20,515</u>	<u>64,811</u>	<u>44,303</u>	<u>7</u>

Maturities of investments in available-for-sale securities as of March 31, 2015 and 2014 are as follows:

	Yen (millions)			
	2015		2014	
	Cost	Fair value	Cost	Fair value
Due after one year through five years	2,357	2,373	1,377	1,381

	<u>24,110</u>	<u>76,929</u>	<u>20,515</u>	<u>64,811</u>

Proceeds from sale of available-for-sale securities for the years ended March 31, 2015, 2014 and 2013 were 11,185 million yen, 45,376 million yen and 144,139 million yen, respectively. The gross realized gains on sale of available-for-sale securities for the years ended March 31, 2015, 2014 and 2013 were 1,561 million yen, 23,734 million yen and 32,440 million yen, respectively. Gross realized losses for the years ended March 31, 2015, 2014 and 2013 were 5 million yen, zero and 2,734 million yen, respectively. The cost of securities sold in computing gross realized gains and losses is determined by the average cost method.

During the years ended March 31, 2015 and 2014, the Company did not incur a write-down for other-than-temporary impairment of available-for-sale securities. During the year ended March 31, 2013, the Company incurred a write-down of 4,000 million yen, for other-than-temporary impairment of available-for-sale securities, mainly reflecting the aggravated market condition of certain industries in Japan. The write-down is included in other deductions in the consolidated statements of operations.

Gross unrealized holding losses on investments in available-for-sale securities and the fair value of the related investments, aggregated by investment category and length of time that individual securities have been in a continuous unrealized loss position, as of March 31, 2015 and 2014 are as follows:

	Yen (millions)					
	2015					
	Less than 12 months		12 months or more		Total	
	Fair value	Unrealized losses	Fair value	Unrealized losses	Fair value	Unrealized losses
Equity securities	491	2	—	—	491	2
	<u>491</u>	<u>2</u>	<u>—</u>	<u>—</u>	<u>491</u>	<u>2</u>

Yen (millions)

	2014					
	Less than 12 months		12 months or more		Total	
	Fair value	Unrealized losses	Fair value	Unrealized losses	Fair value	Unrealized losses
Equity securities	89	7	—	—	89	7
	89	7	—	—	89	7

The gross unrealized loss position has been continuing for a relatively short period of time. Based on this and other relevant factors, management has determined that these investments are not considered other-than-temporarily impaired. The Company did not have investment securities that had been in a continuous loss position for twelve months or more as of March 31, 2015 and 2014.

The carrying amounts of the Company's cost method investments totaled 21,877 million yen and 20,677 million yen as of March 31, 2015 and 2014, respectively. For substantially all such investments, the Company did not evaluate for impairment losses, as there were no significant events or changes that might have affected the fair value of investments were observed. A part of such investments was considered other-than-temporarily impaired and the Company recorded a write-down of 1,023 million yen, 142 million yen and 17 million yen for the years ended March 31, 2015, 2014 and 2013, respectively.

(5) Leases

The Company has capital and operating leases for certain land, buildings, machinery and equipment, and finite-lived intangible assets with SMTPFC and other third parties.

During the years ended March 31, 2015 and 2014, proceeds from sale of assets subject to subsequent lease-back were not material to the Company. During the years ended March 31, 2013, the Company sold and leased back certain land, buildings, and machinery and equipment for 68,071 million yen. The base lease term ranges up to ten years. The resulting leases are being accounted for as operating leases or capital leases.

The Company has options to purchase certain leased assets, mainly leased machinery and equipment, or to terminate the leases and guarantee a specified value of the leased assets, subject to certain conditions, during or at the end of the lease term. With respect to leased land and buildings, there are no future commitments, obligations, provisions, or circumstances that require or result in the Company's continuing involvement.

As of March 31, 2015 and 2014, the gross book value of land, buildings, machinery and equipment, and finite-lived intangible assets under capital leases, including the above-mentioned sale-leaseback transactions was 35,488 million yen and 32,257 million yen, and the related accumulated amortization recorded was 15,063 million yen and 12,878 million yen, respectively.

Rental expenses for operating leases, including the above-mentioned sale-leaseback transactions were 39,331 million yen, 41,536 million yen and 41,297 million yen for the years ended March 31, 2015, 2014 and 2013, respectively.

Future minimum lease payments under non-cancelable capital leases and operating leases as of March 31, 2015 are as follows:

	Yen (millions)	
	Capital leases	Operating leases
Year ending March 31		
2016	9,665	31,013
2017	9,094	16,303
2018	8,425	6,758
2019	7,787	5,413
2020	5,695	4,436
Thereafter	2,079	12,325
Total minimum lease payments	42,745	76,248
Less amount representing interest	2,566	
Present value of net minimum lease payments	40,179	
Less current portion	8,857	
Long-term capital lease obligations	31,322	

(6) Long-Lived Assets

The Company periodically reviews the recorded value of its long-lived assets to determine if the future cash flows to be derived from these assets or related asset group will be sufficient to recover the remaining recorded asset values. Impairment losses are not charged to segment profit. Impairment losses by segment for the years ended March 31 2015, 2014 and 2013 are as follows:

	Yen (millions)		
	2015	2014	2013
Appliances	3,801	6,681	6
Eco Solutions	5,275	7,117	76,995
AVC Networks	3,876	25,563	5,984

The carrying amount of goodwill by segment shown above is the total amount of goodwill allocated to reporting units for impairment test by segment and the allocation does not agree with that used for internal management purposes.

The Company recorded impairment losses of 8,415 million yen for the year ended March 31, 2015 related to goodwill of certain businesses in “AVC Networks” segments. The Company also recorded impairment losses of 7,586 million yen for the year ended March 31, 2015 related to goodwill of certain device business in “Automotive & Industrial Systems” segments. These impairments were due to a downturn in profitability of each business and the fair value was determined mainly based on the discounted cash flow method.

Goodwill related to “Other” segment decreased mainly as a result of disposition of the healthcare business in the year ended March 31, 2014.

The Company recorded impairment losses of 72,197 million yen for the year ended March 31, 2013 related to goodwill of solar battery business in “Eco Solutions” segment. This impairment was due to the continuous substantial decline of product prices and reversal of strategies for sales and investments which resulted in a decrease in the estimated fair value of the reporting unit. The fair value was determined based on the combination of discounted cash flow method, guideline public company method and guideline transaction method.

The Company recorded impairment losses of 91,007 million yen for the year ended March 31, 2013 related to goodwill of mobile phone business in “AVC Networks” segment. This impairment was due to the decline in market share in Japan and the revision of the overseas development strategy which resulted in a decrease in the estimated fair value of the reporting unit. The fair value was determined based on the combination of discounted cash flow method, guideline public company method and guideline transaction method.

The Company recorded impairment losses of 74,574 million yen for the year ended March 31, 2013 related to goodwill of consumer lithium-ion battery business in “Automotive & Industrial Systems” segment. This impairment was due to the continuous substantial decline of product prices and reversal of strategies for sales and investment which resulted in a decrease in the estimated fair value of the reporting unit. The fair value was determined based on the combination of discounted cash flow method, guideline public company method and guideline transaction method.

The Company recorded impairment losses of 12,805 million yen for the year ended March 31, 2013 related to certain businesses in “Automotive & Industrial Systems” segment. These impairments were due to a downturn in profitability and the fair values were mainly determined based on the combination of discounted cash flow method and guideline public company method.

*1 Bond originally issued by SANYO Electric Co., Ltd. (SANYO) was transferred to the Company during the year ended March 31, 2012.

*2 Bonds originally issued by Panasonic Electric Works Co., Ltd. (PEW) were transferred to the Company during the year ended March 31, 2012.

The aggregate annual maturities of long-term debt after March 31, 2015 are as follows:

Year ending March 31	Yen (millions)
2016	249,644
2017	9,154
2018	158,127
2019	107,605
2020	255,521
2021 and thereafter	181,978

As is customary in Japan, short-term and long-term bank loans are made under general agreements which provide that security and guarantees for future and present indebtedness will be given upon request of the bank, and that the bank shall have the right, when the obligations become due, or in the event of their default, to offset cash deposits against such obligations due to the bank. As of March 31, 2015 and 2014, loans subject to such general agreements amounted to 614 million yen and 825 million

yen, respectively.

Each of the loan agreements grants the lender the right to request additional security or mortgages on certain assets. As of March 31, 2015 and 2014, investments and advances with a book value of 1,531 million yen and 1,754 million yen, respectively, were pledged as collateral by subsidiaries for secured loans from banks.

The weighted-average interest rate on short-term debt outstanding as of March 31, 2015 and 2014 was 8.3% and 7.6%, respectively.

(9) Retirement and Severance Benefits

The Company and certain subsidiaries have contributory, funded benefit pension plans covering substantially all employees who meet eligibility requirements. Benefits under the plans are primarily based on the combination of years of service and compensation.

In addition to the plans described above, upon retirement or termination of employment for reasons other than dismissal, employees are entitled to lump-sum payments based on the current rate of pay and length of service. If the termination is involuntary or caused by death, the severance payment is greater than in the case of voluntary termination. The lump-sum payment plans are not funded.

Effective April 1, 2002, the Company and some of the subsidiaries amended their benefit pension plans by introducing a “point-based benefits system,” and changing their lump-sum payment plans to cash balance pension plans. Under the point-based benefits system, benefits are calculated based on accumulated points allocated to employees each year according to their job classification and years of service. Under the cash balance pension plans, each participant has an account which is credited yearly based on the current rate of pay and market-related interest rate.

Effective July 1, 2013, the Company and certain domestic subsidiaries decided to make a transition from the defined benefit pension plan to a defined contribution pension plan with respect to employees’ future service. Under the provision of ASC 715, upon this transition, any decrease in projected benefit obligations (PBO) due to plan amendments in the past remaining in pension liability adjustments under accumulated other comprehensive income (loss) is required to be immediately recognized in earnings. Accordingly, the Company recognized a curtailment gain of 79,762 million yen in other income in the consolidated statement of operations for the year ended March 31, 2014.

Reconciliations of beginning and ending balances of the benefit obligations of the contributory, funded benefit pension plans, the unfunded lump-sum payment plans, and the cash balance pension plans, and the fair value of the plan assets as of March 31, 2015 and 2014 are as follows:

Net periodic benefit cost for the contributory, funded benefit pension plans, the unfunded lump-sum payment plans, and the cash balance pension plans of the Company for the years ended March 31, 2015, 2014 and 2013 consists of the following components:

	Yen (millions)		
	2015	2014	2013
Service cost—benefits earned during the year	16,553	26,570	55,123
Interest cost on projected benefit obligation	38,164	40,103	51,621
Expected return on plan assets	(53,104)	(50,593)	(53,764)

Losses (gains) on curtailments and settlements	8,323	(77,938)	2,209
Net periodic benefit cost	22,648	(45,037)	63,066

The estimated prior service benefit and actuarial loss for the defined benefit pension plans that will be amortized from accumulated other comprehensive income (loss) into net periodic benefit cost for the year ending March 31, 2016 are gains of 4,396 million yen and losses of 23,114 million yen, respectively.

Weighted-average assumptions used to determine benefit obligations as of March 31, 2015 and 2014 are as follows:

	<u>2015</u>	<u>2014</u>
Discount rate	1.3%	1.6%
Rate of compensation increase	4.0%	2.8%

Weighted-average assumptions used to determine net periodic benefit cost for the years ended March 31, 2015, 2014 and 2013 are as follows:

	<u>2015</u>	<u>2014</u>	<u>2013</u>
Discount rate	1.6%	1.6%	2.2%
Expected return on plan assets	2.7%	2.7%	3.1%
Rate of compensation increase	2.8%	1.7%	1.8%

The expected return on plan assets is determined based on the portfolio as a whole and not on the sum of the returns on individual asset categories, considering long-term historical returns, asset allocation, and future estimates of long-term investment returns.

Each plan of the Company has a different investment policy, which is designed to ensure sufficient plan assets are available to provide future payments of pension benefits to the eligible plan participants and is individually monitored for compliance and appropriateness on an on-going basis. Considering the expected long-term rate of return on plan assets, each plan of the Company establishes a “basic” portfolio comprised of the optimal combination of equity securities and debt securities. Plan assets are invested in individual equity and debt securities using the guidelines of the “basic” portfolio in order to generate a total return that will satisfy the expected return on a mid-term to long-term basis. The Company evaluates the difference between expected return and actual return of invested plan assets on an annual basis to determine if such differences necessitate a revision in the formulation of the “basic” portfolio. The Company revises the “basic” portfolio when and to the extent considered necessary to achieve the expected long-term rate of return on plan assets.

The Company’s pension plan assets allocation is approximately 25% for equity securities, approximately 50% for debt securities, and approximately 25% for other investments, primarily in life insurance company general accounts.

For the Company’s major defined benefit pension plans, equity investments are mainly investments in listed equity securities, broadly in Japanese equity, developed international equity and emerging markets. The investments in debt securities are comprised primarily of government, municipal, and corporate bonds. The Company mainly chooses debt securities with rating above BBB, high liquidity and appropriate repayment, and has appropriately diversified the investments by sector and geography. As for investments in life insurance company general accounts, the contracts with the insurance companies include a guaranteed interest rate and return of capital. Other investments include fund-of-funds investment, equity long/short hedge funds investment and private equity investment. Fund-of-funds investment and equity long/short hedge funds investment are primarily invested in listed equity securities with trading frequency and a stable return, while private equity investment is diversified products with low correlation.

The fair values of the Company's pension plan assets as of March 31, 2015, by asset category are as follows:

- (b) These funds primarily invest in Japanese government bonds and foreign government bonds.
- (c) Other investments primarily include fund-of-funds investment, equity long/short hedge funds investment, private equity investment and collateralized loan obligation investment.

The three levels of the fair value hierarchy are discussed in Note 18.

Level 1 assets are comprised principally of equity securities and government and municipal bonds, which are valued using unadjusted quoted market price in active markets with sufficient volume and frequency of transactions.

Level 2 assets are comprised principally of commingled funds, which are valued at their net asset values that are calculated by the fund and have daily liquidity, corporate bonds, which are valued based on quoted prices for identical assets in markets that are not active, and life insurance company general accounts, which are valued at conversion value. Fund-of-funds investment and hedge funds investment that use equity long/short strategies, which primarily invest in listed equity securities and debt securities, are valued based on net asset value.

Level 3 assets are comprised principally of collateralized loan obligation investment and private equity investment, which are valued based on prices and other relevant information such as similar market transactions and latest financial information available.

A reconciliation of the beginning and ending balances of level 3 assets as of March 31, 2015 and 2014 is as follows:

During the year ended March 31, 2015, changes in Japanese corporate tax law and statutory tax rates to be applied to taxable income from the following years were enacted in Japan, where the statutory tax rate will be reduced to 32.1%, as well as net operating loss deduction limit will be reduced from the current 80% to 50% of taxable income both in two steps by 2018. Income taxes for the year ended March 31, 2015 included the effect to deferred tax assets and liabilities which resulted from the change of the aforementioned tax rates and a reduction in the net operating loss deduction limit for net operating loss.

During the year ended March 31, 2012, changes in Japanese corporate tax law and statutory tax rates to be applied to taxable income from the following years in two steps were enacted in Japan. During the year ended March 31, 2014, Japanese corporate tax law which changed the applicable fiscal year of the second reductions in rates was enacted. Income taxes for the year ended March 31, 2014 included the effect to deferred tax assets and liabilities which resulted from the change of the aforementioned tax rates. This effect resulted in an expense which was not material to the Company.

Included in provision for income taxes for the year ended March 31, 2015 was an income tax benefit associated with decreases in valuation allowance on deferred tax assets of 130,159 million yen in Panasonic Corporation. This change in the judgment is primarily a result of new positive evidence based on the improvement in its profitability in recent years and expectations for future years, reflecting the Company's successful implementation of business restructurings, eliminating a number of unprofitable businesses and shifting its resources to key target areas and markets with future growth potential. The Company's conclusion that it is more likely than not that 130,159 million of gross deferred tax assets net of valuation allowance will be realized is based, among other things, on management's estimate of future taxable income, which is based on internal projections that consider historical performance, multiple internal scenarios and assumptions, as well as external data that management believes is reasonable. If events are identified that affect the Company's ability to utilize its deferred tax assets, the analysis will be updated to determine if any adjustments to the valuation allowance are required. If actual results differ significantly from the current estimates of future taxable income, the deferred tax assets may need to be reduced in the near term. Conversely, better than expected results and continued positive results

and trends could result in further reversal of the deferred tax valuation allowance. Adjustment to the beginning-of-the-year balance of valuation allowances as a result of change in judgment for Panasonic Corporation as well as for a certain domestic subsidiary for the year ended March 31, 2015 was 130,939 million yen.

The tax benefit of net operating loss carryforwards recognized for the years ended March 31, 2015, 2014 and 2013 were 21,824 million yen, 69,937 million yen and 29,779 million yen, respectively.

The tax effects of temporary differences that give rise to significant portions of the deferred tax assets and deferred tax liabilities as of March 31, 2015 and 2014 are presented below:

In assessing the realizability of deferred tax assets, management considers whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. The ultimate realization of deferred tax assets is dependent upon the generation of future taxable income during the periods in which those temporary differences and loss carryforwards become deductible. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Based upon the level of historical taxable income and projections for future taxable income over the periods in which the deferred tax assets are deductible, management believes it is more likely than not that the Company will realize the benefits of these deductible differences and loss carryforwards, net of the existing valuation allowances as of March 31, 2015 and 2014.

The net change in total valuation allowance for the years ended March 31, 2015, 2014 and 2013 was a decrease of 281,925 million yen, of which a decrease due to the expiration of tax loss carryforwards amounted to 79,878 million yen and change in tax rate and law amounted to 99,311 million yen, a decrease of 65,582 million yen, of which a decrease due to the expiration of tax loss carryforwards amounted to 95,412 million yen, and an increase of 403,255 million yen, respectively.

As of March 31, 2015, the Company had, for income tax purposes, net operating loss carryforwards of approximately 2,233,341 million yen, of which 2,081,792 million yen expire from the year ending March 31, 2016 through 2024 and the remaining balance will expire thereafter or do not expire. As of March 31, 2015, the Company had, for income tax purposes, tax credit carryforwards of approximately 37,785 million yen, which expire within the years ending March 31, 2016 through 2018.

Net deferred tax assets and liabilities as of March 31, 2015 and 2014 are reflected in the accompanying consolidated balance sheets under the following captions:

	Yen (millions)

Other liabilities	(50,927)	(89,393)
Net deferred tax assets	237,168	114,678

The Company has not recognized a deferred tax liability for temporary differences associated with investments in foreign subsidiaries and foreign corporate joint ventures of 811,686 million yen as of March 31, 2015, because the related earnings are not planned to remit to the parent and are to be indefinitely reinvested. A deferred tax liability will be recognized when the Company no longer plans to indefinitely reinvest undistributed earnings, and current tax will be incurred upon distribution from or sale of subsidiaries. The calculation of related unrecognized deferred tax liability is not practicable.

A reconciliation of the beginning and ending amounts of unrecognized tax benefits for the years ended March 31, 2015, 2014 and 2013 is as follows:

	Yen (millions)		
	2015	2014	2013
Balance at beginning of year	(14,618)	(15,126)	(15,311)

As of March 31, 2015, 2014 and 2013, the total amount of unrecognized tax benefits are 18,741 million yen, 13,527 million yen and 14,675 million yen, respectively, that if recognized, would reduce the effective tax rate. The Company has accrued interests and penalties related to unrecognized tax benefits and the amount of interest and penalties included in provision for income taxes and cumulative amount accrued were not material as of and for the years ended March 31, 2015, 2014 and 2013.

The Company files income tax returns in Japan and various foreign tax jurisdictions. There are a number of subsidiaries which operate within each of the Company's major jurisdictions resulting in a range of open tax years. The open tax years for Panasonic Corporation are for the year ended March 31, 2014 and thereafter. The open tax years for the significant subsidiaries in the United States of America, which is the other major tax jurisdiction besides Japan, are for the year ended March 31, 2012 and thereafter.

(11) Net Income (Loss) Attributable to Panasonic Corporation Common Shareholders per Share

A reconciliation of the numerators and denominators of the basic and diluted net income (loss) attributable to Panasonic Corporation common shareholders per share computation for the years ended March 31, 2015, 2014 and 2013 are as follows:

(12) Stockholders' Equity

The Company may repurchase its common stock from the market pursuant to the Company Law of Japan. For the years ended March 31, 2015, 2014 and 2013, respectively, 298,329 shares, 108,780 shares and 57,369 shares were repurchased.

The Company sold 5,607 shares, 6,858 shares and 14,291 shares of its treasury stock for the years ended March 31, 2015, 2014 and 2013, respectively.

The Company Law of Japan provides that an amount equal to 10% of cash dividends be appropriated as a capital reserve or legal reserve until the aggregated amount of capital reserve and legal reserve equals 25% of stated capital. The capital reserve and legal reserve are not available for dividends but may be transferred to capital surplus or retained earnings or stated capital upon approval at the shareholders' meeting.

Cash dividends and transfers to the legal reserve charged to retained earnings during the years ended March 31, 2015, 2014 and 2013 represent dividends paid out during the periods and related appropriation to the legal reserve. Cash dividends per share paid during the years ended March 31, 2015, 2014 and 2013 amounted to 16.00 yen, 5.00 yen and 5.00 yen, respectively. The accompanying consolidated financial statements do not include any provisions for the year-end dividend of 10.00 yen per share, totaling approximately 23,113 million yen in respect of the year ended March 31, 2015 approved by the board of directors in April 2015.

In accordance with the Company Law of Japan, there are certain restrictions on payment of dividends in connection with the treasury stock repurchased. As a result of restrictions on the treasury stock repurchased, retained earnings of 247,807 million yen as of March 31, 2015 were restricted as to the payment of cash dividends.

(17) Derivatives and Hedging Activities

The Company operates internationally, giving rise to significant exposure to market risks arising from changes in foreign exchange rates, and commodity prices. The Company assesses these risks by continually monitoring changes in these exposures and by evaluating hedging opportunities. Derivative financial instruments utilized by the Company to hedge these risks are comprised principally of foreign exchange contracts, cross currency swaps and commodity derivatives. The Company does not hold or issue derivative financial instruments for trading purpose.

Amounts included in accumulated other comprehensive income (loss) as of March 31, 2015 are expected to be recognized in earnings principally over the next twelve months. The maximum term over which the Company is hedging exposures to the variability of cash flows for foreign currency exchange risk is approximately five months.

The Company is exposed to credit risk in the event of non-performance by counterparties to the derivative contracts, but such risk is considered mitigated by the high credit rating of the counterparties.

The contract amounts of foreign exchange contracts, cross currency swaps, and commodity futures as of March 31, 2015 and 2014 are as follows:

	Yen (millions)	
	2015	2014

(18) Fair Value

ASC 820, “Fair Value Measurements and Disclosures” defines fair value and establishes a fair value hierarchy that prioritizes the inputs to valuation techniques used to measure fair value. The three levels of the fair value hierarchy are as follows:

- Level 1 — Quoted prices (unadjusted) in active markets for identical assets.
- Level 2 — Quoted prices for similar assets or liabilities in active markets, quoted prices for identical or similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable, and inputs that are derived principally from or corroborated by observable market data by correlation or other means.
- Level 3 — Unobservable inputs for the asset or liability.

The following table represents assets and liabilities that are measured at fair value on a recurring basis as of March 31, 2015 and 2014:

	Yen (millions)			
	March 31, 2015			
	Level 1	Level 2	Level 3	Total

Commodity futures	8,000	2,058	—	10,058
Total derivatives	8,000	4,629	—	12,629

The Company's existing marketable equity securities and commodity futures are included in Level 1, which are valued using an unadjusted quoted market price in active markets with sufficient volume and frequency of transactions.

Level 2 available-for-sale securities include all debt securities, which are valued using inputs other than quoted prices that are observable. Level 2 derivatives including foreign exchange contracts, cross currency swaps and commodity futures are valued using quotes obtained from brokers, which are periodically validated by pricing models using observable market inputs, such as foreign currency exchange rates and market prices for commodity futures.

The following table presents assets and liabilities that are measured at fair value on a nonrecurring basis for the years ended March 31, 2015 and 2014;

During the year ended March 31, 2015, the Company classified all of the assets described above in Level 3 as the Company used unobservable inputs to value these assets when recognizing losses related to the assets. The fair value for the major assets was measured primarily through an appraisal based on the repurchase cost and discounted cash flow method.

During the year ended March 31, 2014, the Company classified all of the assets described above in Level 3 as the Company used unobservable inputs to value these assets when recognizing losses related to the assets. The fair value for the major assets was measured primarily through an appraisal based on the repurchase cost.

The following table presents significant unobservable inputs used to measure fair value on a nonrecurring basis categorized as Level 3 for the years ended March 31, 2015 and 2014:

The fair value of financial instrument

The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Available-for-sale securities

The carrying amount is equal to the fair value which is estimated based on quoted market prices or other observable inputs. The fair value is also described in Note 4.

Long-term debt, including current portion

The fair value of long-term debt is estimated based on quoted market prices or the present value of future cash flows using appropriate current discount rates. The Company classified long-term debt in Level 2.

Derivative financial instruments

The fair value of derivative financial instruments is estimated based on unadjusted market prices or quotes obtained from brokers, which are periodically validated by pricing models using observable inactive market inputs. The fair value is equal to the carrying amount and also described in Note 17.

Advances

The fair value of advances is estimated based on the present value of future cash flows using appropriate current discount rates. The Company classified advances in Level 2. The following table excludes advances for which carrying amount approximates fair value.

Financial instruments other than those listed above (such as Cash and cash equivalents, Time deposits, Trade receivables, Short-term debt, Trade payables and Accrued expenses)

The carrying amount approximates fair value because of the short maturity of these instruments. The following table excludes these financial instruments.

Limitations

Fair value estimates are made at a specific point in time, based on relevant market information and information about the financial instruments. These estimates are subjective in nature and involve uncertainties and matters of significant judgments and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

(19) Commitments and Contingent Liabilities

The Company provides guarantees to third parties mainly on bank loans provided to associated companies and customers. The guarantees are made to enhance their credit. For each guarantee provided, the Company is required to perform under the guarantee if the guaranteed party defaults on a payment. Also, as discussed in Note 16, the Company sold certain trade receivables to independent third parties, some of which are with recourse. If the collectibility of those receivables with recourse becomes doubtful, the Company is obligated to assume the liabilities. As of March 31, 2015, the maximum amount of undiscounted payments the Company would have to make in the event of default was 23,280 million yen. The carrying amount of the liabilities recognized for the Company's obligations as a guarantor under those guarantees as of March 31, 2015 was immaterial.

As discussed in Note 5, in connection with the sale and leaseback of certain machinery and equipment, the Company guarantees a specific value of the leased assets. For each guarantee provided, the Company is required to perform under the guarantee if certain conditions are met during or at the end of the lease term. As of March 31, 2015, the maximum amount of undiscounted payments the Company would have to make in the event that these conditions are met was 2,850 million yen. The carrying amount of the liabilities recognized for the Company's obligations as a guarantor under those guarantees as of March 31, 2015 was immaterial.

The Company issues contractual product warranties under which it generally guarantees the performance of products delivered and services rendered for a certain period or term. The change in accrued warranty costs for the years ended March 31, 2015 and 2014 is summarized as follows:

	Yen (millions)	
	2015	2014
Balance at beginning of year	56,576	50,855
Liabilities accrued for warranties issued	26,606	31,818
Warranty claims paid	(27,859)	(26,624)
Changes in liabilities for pre-existing warranties, including expirations	93	527
Balance at end of year	55,416	56,576

As of March 31, 2015, commitments outstanding for the purchase of property, plant and equipment, including the estimated amount based on capital investment agreements, were approximately 36,585 million yen. Certain subsidiaries are under contracts to purchase specific raw materials until 2020. As of March 31, 2015, commitments outstanding for this contract were approximately 72,238 million yen. A loss of 16,732 million yen under this contract was recorded for the year ended March 31, 2014. The corresponding loss is included in cost of sales.

Liabilities for environmental remediation costs are recorded when it is probable that obligations have been incurred and the amounts can be reasonably estimated. In January 2003, the Company announced that disposed electric equipment that contained polychlorinated biphenyls (PCB equipment) might be buried in the ground of its four manufacturing facilities and one former manufacturing facility. The applicable laws require that PCB equipment be appropriately maintained and disposed of by March 31, 2027. As of March 31, 2015, the Company has accrued estimated total cost of 16,890 million yen for necessary actions such as investigating whether the PCB equipment is buried at the facilities, including excavations, maintaining and disposing the PCB equipment that is already discovered, and soil remediation. While it represents management's best estimate of the cost, the payments are not considered to be fixed and reliably determinable.

The Company and certain subsidiaries are under the term of leasehold interest contracts for the land which domestic factories reside on and have obligations for restitution on departure. The asset retirement obligations cannot be reasonably estimated because the durations of use of the leased land are not specified and there are no plans to undertake relocation in the future. Therefore the Company did not recognize asset retirement obligations.

The Company and certain of its subsidiaries are subject to a number of legal proceedings including civil litigations related to trade, tax, products or intellectual properties, or governmental investigations. The Company has been dealing with the various litigations and investigations. Depending upon the outcome of these different proceedings, the Company and certain of its subsidiaries may be subject to an uncertain amount of fines, and accordingly the Company has accrued for certain probable and reasonable estimated amounts for the fines.

Since November 2007, the Company and MT Picture Display Co., Ltd. (MTPD), a subsidiary of the Company, have been subjected to investigations by government authorities, including the Japan Fair Trade Commission, the U.S. Department of Justice and the European Commission, in respect of alleged antitrust violations relating to cathode ray tubes (CRTs). For the year ended March 31, 2010, the Japan Fair Trade Commission issued a cease and desist order against MTPD and assessed a fine against its three subsidiaries in South East Asia, but each named company filed for a hearing to challenge the orders which is currently subject to proceedings. Since June 2012, the Company and Sanyo Electric Co., Ltd., a subsidiary of the Company, have been subjected to investigations by the European Commission, in respect of alleged antitrust violations relating to the rechargeable battery. Other than those above, there are a number of legal actions against the Company and certain subsidiaries. Management is of the opinion that damages, if any, resulting from these actions, will not have a material effect on the Company's consolidated financial statements.

The ability to predict the outcome of these actions and proceedings is difficult to assess given that certain of the investigations and legal proceedings are still at an early stage, present novel legal theories, involve a large number of parties or taking place in jurisdictions outside of Japan where the laws are complex or unclear. Accordingly, the Company is unable to estimate the losses or range of losses for the actions and proceedings where there is only a reasonable possibility that a loss exceeding amounts already recognized may have been incurred.

(20) Segment Information

The figures in “Eliminations and Adjustments” include revenues and expenses which are not attributable to any reportable segments for the purpose of evaluating operating results of each segment, consolidation adjustments, and eliminations of intersegment transactions.

Adjustments to segment sales to Customers for the years ended March 31, 2015, 2014 and 2013 mainly include price differences of 611,706 million yen, 642,832 million yen and 592,893 million yen, respectively, between sales prices to external customers and the internal sales prices adopted for performance measurement purposes for the sales of consumer products through sales departments. Adjustments also include the sales of certain associated companies under the equity method, amounting to a deduction of 98,684 million yen, 105,815 million yen and 96,225 million yen, respectively, included in segment sales solely for the purpose of assessing segment performance.

Adjustments to segment profit for the years ended March 31, 2015, 2014 and 2013 mainly include 55,305 million yen, 14,568 million yen, and (17,210) million yen, respectively, of profit and (loss) of corporate headquarters and sales departments of consumer products which are not allocated to any reportable segments. The adjustments also include 18,819 million yen, 39,729 million yen and 34,073 million yen of consolidation adjustments, respectively, mainly related to amortization of finite-lived intangible assets recognized upon business combinations and other differences in accounting standards.

Assets which are not attributable to any reportable segments include those which are attributable to sales departments of consumer products, goodwill controlled by corporate headquarters, and intangible assets recognized upon business combinations.

Capital investment consists of purchases of property, plant and equipment, and intangibles on an accrual basis.

By Geographical Area:

There are no individually material countries which should be separately disclosed in North and South America, Europe, and Asia and Others, except for the United States of America and China on sales.

Transfers between business segments or geographic segments are made at arms-length prices. There are no sales to a single external major customer for the years ended March 31, 2015, 2014 and 2013.

(21) Acquisition

On February 28, 2014, the Company acquired 90% of outstanding shares of Viko Electric Co., Ltd. (VIKO) and accordingly, has a controlling interest in VIKO from the acquisition date.

VIKO is in the business of manufacturing and sales of electrical and materials, such as wiring devices, low voltage switchgears, smart meters and building automation system. As a result of this acquisition, by utilizing VIKO's management resources, such as its strong brand awareness, sales channels, and "C-Type" wiring devices and technologies, using Turkey as the base, the Company expects expansion in the sales of wiring devices and other product ranges as well as electrical equipment and materials produced by the Company, such as lighting devices and fans, not only in Turkey, but in the Middle East, CIS and African markets. In addition, by introducing new products by making use of the Company's product competitiveness and development capabilities, and by making improvements in productivity through sharing manufacturing know-how with VIKO, the Company will create synergies with VIKO and is aiming for further expansion of the business.

The fair value of the consideration paid for the controlling interest of VIKO and the noncontrolling interests as of the acquisition date is as follows:

	Yen (millions)
Fair value of consideration:	
Cash	47,510
Fair value of noncontrolling interests	3,771
	<hr/>
Total	51,281
	<hr/>

The fair value of noncontrolling interests was estimated based on the acquisition consideration taking into consideration a control premium. Acquisition-related cost was not material.

Assets acquired and liabilities assumed as of the acquisition date were as follows:

	Yen (millions)
Cash and cash equivalents	131
Goodwill	23,145
Intangible assets	30,295
Other assets	11,701
	<hr/>
Total assets acquired	65,272
	<hr/>
Deferred tax liabilities	5,963
Other liabilities	8,028
	<hr/>
Total liabilities assumed	13,991
	<hr/>
Total net assets acquired	51,281
	<hr/>

Intangible assets of 20,188 million yen are subject to amortization, which include a dealer network of 17,629 million yen with a 13-year useful life. Intangible assets of 10,107 million yen are not subject to amortization, all of which relates to trade name.

The goodwill represents the future expansion of the Company from new revenue streams arising from the acquisition of VIKO and synergies with the existing Company's businesses. The total amount of goodwill is included in "Eco Solutions" segment, and is not deductible for tax purpose.

Net sales and income before income taxes of VIKO that are included in the consolidated statements of operations for the year ended March 31, 2014 are not material.

Pro forma information has been omitted as the amounts are not material.

(22) Stock-Based Compensation

On July 31, 2014, the Company approved to grant stock acquisition rights as an incentive stock-based compensation plan to the directors of Panasonic, the executive officers and certain other officers who are responsible for business operations. Subsequently on August 22, 2014, the Company granted stock acquisition rights to acquire 208,800 shares of common stock at a grant date fair value of 1,054 yen. The stock acquisition rights are fully vested on grant date and have a 30 years exercisable period from August 23, 2014 to August 22, 2044. During the period when stock acquisition rights may be exercised, the holder can exercise the rights on the day following the date on which such holder loses the status as the director, the executive officer or any status equivalent thereto.

The stock-based compensation expense for these stock acquisition rights for the year ended March 31, 2015, was 220 million yen included in selling, general and administrative expenses in the consolidated statements of operations. The income tax benefit related to the stock-based compensation expense during the year ended March 31, 2015, was not material.

The fair value of stock acquisition rights granted on grant date and used to recognize compensation expense for the year ended March 31, 2015, was estimated using the Black-Scholes option-pricing model with the following assumptions:

	<u>2015</u>
Stock price	1,235.5 yen
Exercise price	1 yen
Expected term	15 years
Risk-free interest rate	0.95%
Expected volatility	35.17%
Expected dividends	1.05%

A summary of the activities regarding the stock acquisition rights as of and for the year ended March 31, 2015, is presented below:

	<u>Shares</u>	<u>Weighted-average exercise price (Yen)</u>	<u>Weighted-average remaining contractual term (Year)</u>	<u>Aggregate intrinsic value (Million yen)</u>
