

Our Proposal for A Better Future

Environment

Group D

What do you think about environment now?

What makes the environment so bad?

Lack of concern for environment!!

What can WE do?

WE!

As a student:

1. We need to study more about the environment, try to find more solutions for the environmental problem, e.g global warming.
2. We can study hard to improve the eco technology, e.g study engineering, science..

As a next generation:

1. Support the environmental policy
 - We can vote the policy which is good to the environment, e.g plastic packing tax, more plastics people waste, more people need to pay.
2. Try to innovate more environmental friendly products
 - make good use of renewable energy

As a consumer:

1. Choose the product which is environmental friendly.
e.g → Choose electrical car instead of fossil fuel car
→ Choose the products with less or no packing.

As a government:

1. Increase environment education
2. Support eco technology development
3. Increase the environment concern e.g
 - leading the way by supplying environmental sound and infrastructure.

Our Proposal for A Better Future

As a business company:

- Create and innovate more environment friendly products. e.g electricity transportation
- Care more about the environment e.g making less pollution
- sponsor the programs which support the local environment.

Conclusion:

Environment: everything around us our yard, our forest and our park.

It is very important to us. And now let's save the environment, we believe a better, a better future, a better world.

Thank you
