

Our Proposal for A Better Future

How to Connect with People through Sports

Group E

Nowadays, there is a lot of differences between people which include religion, races, nationalities, culture, gender and handicap. Through the activities that we had experience, we reach the same opinion through the group discussion and we had found our ways to overcome the issues caused by differences.

We think that this will fix the problem thanks to those who contribute their ideas.

We propose the future world with our solution through power of sports

Our future image would be:

- Opportunity to find passion
- Equality for everyone
- End of conflicts
 - Tolerance towards each other
 - Having discussion before fighting
- Support towards each other
 - Sharing is caring
 - Donation
 - Empathy
 - Encouragement

Furthermore we can also experience sports through technology devices such as VR technology and AR technology. Not only we can experience sport through reality but also expand futuristic opportunities.

We believe in the power of sports!!
