

# Our Proposal for A Better Future

## Diversity to Empower the Powerless

Group F

In a world pressured by barriers of inequality and exclusion, our global community urges to attend every need of diverse groups and minorities. In most countries, politics is guided by the mentality of power, a problem which creates massive gaps within societies. In these terms, many people do not feel represented, and we aim to transform this reality with our resolution:

We propose the influence of selfless educated people that are genuinely interested in social development, education and leadership in order to protect all human rights. U.N should create representative groups, searching for change-makers that will give the opportunity to influence the government decisions “empowering the powerless”, which will make world citizens involved with politics in a more direct and compassionate way.
