

# Future Declaration

## Introduction:

For many years, the world has seen a dramatic change in its own society, politics, issues, and visions. Today, we are going to talk about some of the main and modern issues.

### The major problems we saw are:

- **Loss of culture [extreme diversity]**
- **Environmental issues [pollution, nature/deforestation]**
- **Educational systems [not practical, low quality, inequality]**

### Our major solutions for each problem are:

- **Preserve our identity**
- **Clean and renewable energy [eco friendly]**
- **Raise awareness**
- **Try to achieve a more practical, relevant and equal educational system**
- **Change mindsets**

We see a better world and a better future that holds our own solutions in a solid concrete based on union, acceptance, respect and gratefulness, in a world where organization, democracy, flexibility are our major resources based on tradition, independence and most importantly, patience and responsibility.
